

# Morgan Stanley Code to Give India '23

Bal Asha Track: Team - 1 (OpenArms)

Rohit Kumar IIT(ISM), Dhanbad Full Stack Developer

Shubhranshu Animesh IIT(ISM), Dhanbad Machine Learning, Frontend

Utkarsh Prasad IIT(ISM), Dhanbad Machine Learning, Frontend

#### **Mentors:**

Nishi Kant & Sudeep Halba

#### **Problem Statement**

□ Bal Asha Trust supports adoption of orphaned children in a systematic way.

<u>Storage System Issues</u>: Manual File System, Data Inconsistency, difficulty in maintenance

<u>Social worker's Issues</u>: Difficult to adapt for new person, Manual **File Entry** 

Manager's Issues: Difficult to monitor all cases

#### **Consequences:**

- Operational Inefficiency
- Inability to track
- Elongation of Process
- Urgent cases may get delayed
- Risks child care

**Code to Give** 

hackathon\_for\_social\_good

### **Proposed Solution:**

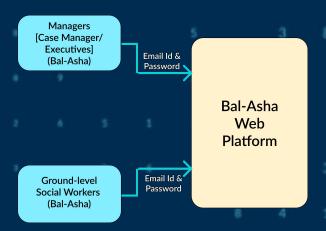

- BAL ASHA Trust
- □ Platform to digitize adoption process of orphans => (Abandoned / Surrendered by parents / Admitted by guardians).
- ☐ Simplified Process: 'Parents Investigation' Step & 'Adoption Docs' Step
- □ Users => (Managers & Social Workers) : easily manage case-related processes & data.

## **Process Flow Diagram**

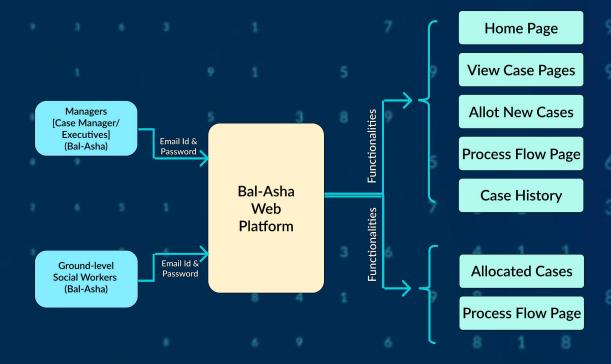

- ☐ We divide the process into a sequence of steps according to the information:
  - User registers or logs in to our platform.

# **Process Flow Diagram**

- We divide the process into a sequence of steps according to the information:
  - Different portal based on role.

# Let us show the Demonstration for our solution first. Then, we'll come back to the presentation.

**Email reminder for Social Worker** 

#### **Data Analytics at Manager Home Page**

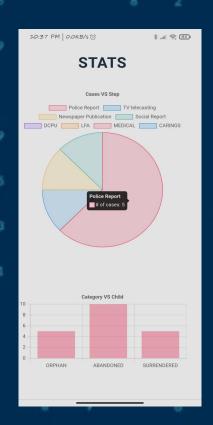

Child profile with all case data

#### **Notable Features - Mobile View**

- UI is Mobile Responsive =>

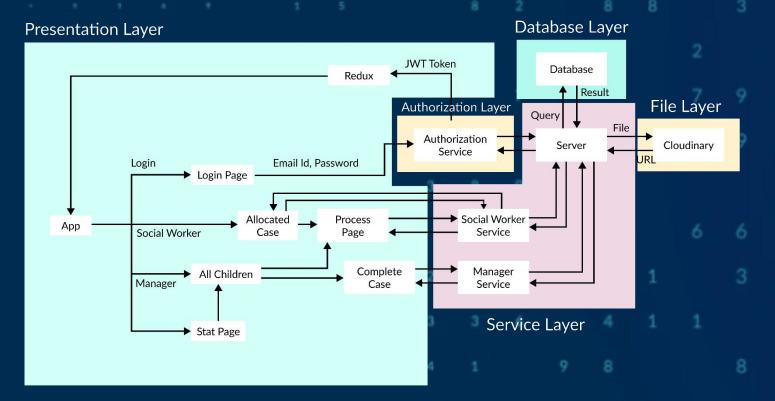

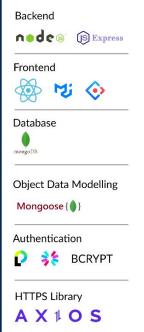

### **Technical Stack & Architecture**

### **Future Works**

**Code to Give** 

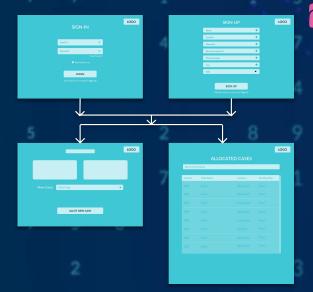

hackathon\_for\_social\_good

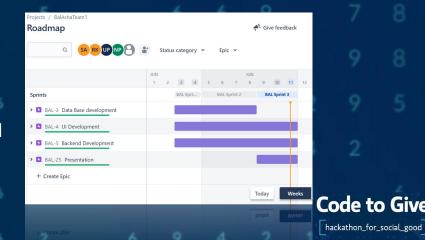

- ☐ Team size reduced to 50%.
- 2 Members having ML profile,Less prior experience in Web Development.
- ☐ Planning features from real-life user POV.

#### Learnings

- Project planning and time estimation.
- Agile methodology for project management with different sprint cycles.
- Using Figma for UI wireframes made Frontend work simpler.
